How to make an album cover with the AI album cover generator

Three steps to a cover with the AI album cover generator, from a blank canvas to your release.

1

Describe your cover

Write the genre, mood, and colors — for example, a surreal psychedelic dreamscape in saturated colors, or a minimalist geometric shape on cream.

2

Pick a model and generate

Choose GPT Image 2 or Nano Banana 2 in the AI album cover generator, then generate. Each generation spends credits, so you are signed in and in control of the run.

3

Refine by re-prompting

Close but not quite? Tweak the mood or palette in your prompt and generate again until the cover fits your sound.
